

GROUP COLLABORATION AGREEMENT

Communication:

We agree to maintain clear, respectful, and consistent communication. Our primary communication platform will be through Discord, Instagram and In-Person Meetings. Any urgent updates will be shared on emails, if necessary.

Meeting:

Meetings will be held once a week in-classroom plus daily discussions on Discord/Instagram. In addition to that we will also be meeting in a group study room every other week.

- **Roles and Responsibilities** - Tasks will be divided fairly based on each member's strengths, interests, and availability. However, all members share equal responsibility for the overall quality of the project. We agree to support one another and assist if someone is struggling with their assigned task.
- **Work Quality and Deadlines** – We have mutually agreed to set up internal deadlines before the original deadline , so we will have sufficient time to review everything which needs to be submitted and there is no rush in the end times. If somebody is having any issue while completing their task they should be informing the group members before the internal deadline.
- **Accountability** – Everybody is expected to complete their assigned task before the internal deadline and if they fail to do so they should be contacting the group members beforehand.
- **Conflict Resolution** - If a group member is experiencing difficulties with their assigned task, they are expected to communicate the issue to the group as soon as possible. We encourage members to ask for help without hesitation to ensure the project stays on track. Any conflicts or misunderstandings will be addressed respectfully through open discussion, focusing on finding solutions rather than placing blame. If an issue cannot be resolved within the group, we will seek guidance from the instructor.
- **Commitment** - We are committed to maintaining professionalism, mutual respect, and equal contribution throughout this project. Our goal is to collaborate effectively, meet all deadlines, and produce high-quality work that reflects our collective effort. Persistent disruptions that hinders the teams progress will enforce contacting the TA's/Profs to find further resolution.
